Professional Summary

Computer Science undergraduate passionate about building scalable and helpful solutions that create a tangible, real-world impact. Actively seeking an internship to apply my technical skills, problem-solving mindset, and innovative thinking in a professional environment.

Education

K.R. Mangalam University, Gurugram, India

Bachelor of Technology in Artificial Intelligence & Machine Learning

Vidya Niketan Public School, Faridabad, India

Technical Skills

Languages: C++, Python, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Tailwind CSS, Framer Motion, Streamlit, Redux

Tools & Platforms: Git, GitHub, Supabase, Groq API, WebRTC, Socket.IO, Postman, Linux

Core Concepts: Data Structures & Algorithms, OOP, DBMS, RESTful APIs, Network Security, System Design

Experience & Leadership

Lead Organizer, AI Workshop & Hackathon | K.R. Mangalam University

May 2026

- Spearheaded a 3-day campus-wide AI workshop and hackathon aimed at training faculty and students in generative AI and cloud computing platforms.
- Managed speaker proposals, event scheduling, and outreach partnerships with regional tech communities including GDG Gurugram.

Open Source Contributor | Hacktoberfest & GSSoC

Apr 2024 – Oct 2025

- Contributed to various open-source repositories, focusing on front-end responsiveness, UI/UX improvements, and resolving core ecosystem bugs.
- Managed distributed version control via Git branching and active pull request workflows, participating in community code reviews.

Projects

Collaborate | *React, Node.js, Express.js, MongoDB, Socket.IO, WebRTC*

2024

- Built a full-stack monorepo platform for team project planning, task tracking, real-time chat, and browser-based video meetings.
- Implemented AI-assisted project generation using Groq SDK to auto-create structured task hierarchies with dependencies, priorities, and duration estimates.
- Engineered real-time meeting rooms with WebRTC signaling and Socket.IO for participant presence, camera/mic toggles, and screen sharing.
- Designed recursive parent/sub-task data models and RESTful APIs covering teams, projects, tasks, messaging, and meetings with JWT-based auth.

Netwatch Sniffer | *C++, libpcap, Python, Streamlit*

2024

- Engineered a high-performance network packet sniffer utilizing a multi-threaded producer-consumer architecture.
- Optimized log handling for large-scale packet data ingestion, generating highly structured JSON network logs.
- Designed a real-time analytics dashboard using Streamlit to visualize network traffic distributions and flag potential security anomalies.

Certifications

- Python Intermediate (HackerRank)
- SQL Intermediate (HackerRank)
- Foundation to AI in Data Analytics
- Data Analysis using Python
- Git & GitHub Essentials

Career Interests

Specializations: Software Development · AI & ML · Backend & Systems Engineering · Open Source Development
